

Refrigerant Compatibility Sheet

Refrigeration Ball Valves

Refrigerants are categorized as HFC (Hydrofluorocarbon) for traditional synthetics, HFO (Hydrofluoroolefin) as low-GWP alternatives, HC (Hydrocarbon) for highly flammable options, and Natural Refrigerants like CO₂ and ammonia, which require specialized components. This guide outlines the compatibility of NDL refrigeration ball valves with these refrigerants, helping professionals choose the right valve for durable, efficient operation.

Confirms that NDL Refrigeration Ball Valves are compatible with the following refrigerants:

TYPE	REFRIGERANT
HFC	R134A
	R32
	R404A
	R407C
	R410A
HFO	R507
	R1234yf
HFO + HFC	R1234ze
	R448A
	R449A
	R450A
	R452A
	R452B
	R454B
	R454C
	R455A
	R513A
	R515A
	R515B
	HC
R600	
R600A	
R1270	
Natural	R744
