APPLICATIONS

Refrigeration, Commercial HVAC-R, VRV, VRF, Multi-mini Split, and Sub-critical Applications.

Refrigeration Ball Valve Insulation (NBV-IN)

Innovative HVAC-R product with high-quality performance, enhancing your experience using NDL valves in the field.

NBV-IN Specifications

The NBV-IN Insulation is an EPDM-based, closed-cell, lightweight elastomeric thermal insulation specifically designed for solar and steam heating applications with service temperatures up to +150C (302F).

Due to the design, it has tough skin for easy installation. It is self-extinguished and does not melt when burnt.

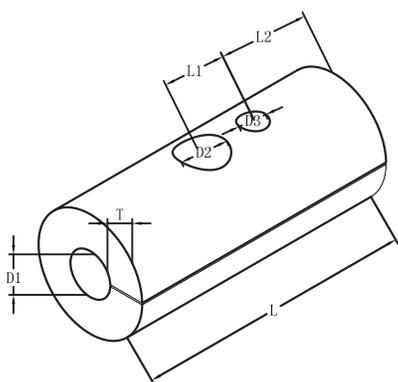

When used outdoors, the NBV-IN Insulation has excellent ozone, UV, and weather resistance properties but may need additional protective coating or jacketing for long-term direct contact with sunlight.

Service Temperature		Up to +150 oC Up to +302oF						ASTM C 411
Water Absorbtion		< 10% (by weight) < 0.20% (by volume)						ASTM D 1056 ASTM C209
Ozone Resistance		No Crack						ASTM E 1149 ASTM D 1171
UV Weather Resistance		Very Good						ASTM G 154
Fire Classification		C ₁ -s2, d0						EN 13501-1
Flammability		Self-Extinguishing Class V-0						ASTM D 635 UL 94
RoHS		Not Detected						EN Restriction of the Use of Hazardous Substances Directive (RoHS) 2002/95/EC
Material		EPDM						
Working Temperature		-57°C to 125°C (-71°F to 257°F)						
UV Resistant Flame/Smoke Rating		15/50						
Color and Wall Thickness		Black, 3/4"
